

# CERBERUS

it just works<sup>®</sup>

[cerberus.briartek.com](http://cerberus.briartek.com)

## Introducing Cerberus

*Adventurers, meet your new best friend.* As its legendary name suggests, Cerberus is a three-part system that will protect you just as the original three-headed dog prevented people from entering the gates of hell. Imagine having the insurance of a three-headed hellhound in your back pocket that protects you on your adventures.

Starting now, you can use your iPhone® or iPod touch® to send and receive messages from anywhere—and we mean anywhere—on earth. Wherever you go, you will be as reachable as you want to be. You also have the option to receive automated alerts if dangerous conditions exist in your area.

Cerberus gives you peace of mind when you take the road less traveled, because no matter how extreme the locale or circumstance, Cerberus will follow you to hell and back.

## *the original* **CerberLink™**

CerberLink is a tracking, messaging, and notification device that allows you to communicate when you are outside of cell and wireless range.

### FEATURES

#### Tracking

- Record your location
- Send breadcrumbs in real time

#### Communications

- Send and receive messages
- Message with family, friends, and other CerberLinks
- Receive message sent confirmation

#### Distress/Safety

- Includes optional distress mode use

#### Alerts

- Receive customized alerts based on location, severe weather, and geo-political events

#### Other

- Use certain features on CerberLink without the CerberTouch app
- Write CerberLink programs with CerberLink to Bluetooth API
- Antennas are embedded

Open device

## *the touchscreen* **Cerberus SD**

Cerberus SD is the latest, fully-contained, touchscreen device that doesn't require any use of the CerberTouch app.

### FEATURES

#### Tracking

- Record your location
- Send breadcrumbs in real time

#### Communications

- Send and receive messages
- Message with family, friends, and Cerberlinks, CerberTalk devices, and other Cerberus SD
- Receive message sent confirmation

#### Distress/Safety

- Includes optional distress mode use

#### Alerts

- Receive customized alerts based on location, severe weather, and geo-political events

#### Other

- No app or phone needed; all features are accessible from the touchscreen
- Ruggedized enclosure with integrated screen cover
- Removable antenna can be replaced using SMA connector for installation in equipment, vehicles, or buildings

**NOTE:** You cannot develop your own apps for Cerberus SD and it is not supported by API. Cerberus SD does not have a Bluetooth connection.

## *the tablet* **CerberTalk**

CerberTalk is the first satellite-equipped tablet that can be set to operate through WiFi, GSM, or satellite.

### FEATURES

#### Tracking

- Record your location
- Send breadcrumbs in real time
- Set Geofences to send and receive data

#### Communications

- Send and receive text messages
- Full duplex data and file transfer via WiFi, GSM, or Satellite
- Voice communication
- Use 3rd party Android apps over Satellite

#### Distress/Safety

- Includes optional distress mode use

#### Alerts

- Works with CerberCenter to monitor weather and other potential threats
- Location-based alerts can be set up

#### Apps

- Tethering of external devices over WiFi to GSM or Satellite
- Location-based data transfer and sync
- Custom apps can access onboard SD card, GSM modem, or Satellite modem and all standard table features
- Runs Android v.4.4 Kit Kat

## *the app* CerberTouch™

CerberTouch is an iPhone, iPod touch, and Android-based application that connects with your CerberusLink through Bluetooth.

### FEATURES

#### Platforms supported

- iPod touch (5th gen)
- iPhone 6, 5S, 5, and 4S
- Requires iOS 8.1 or greater
- Android – v4.4 Kit Kat or later

#### Tracking

- Record location in real time
- Send breadcrumbs in real time
- Drop breadcrumbs with text

#### Alerts

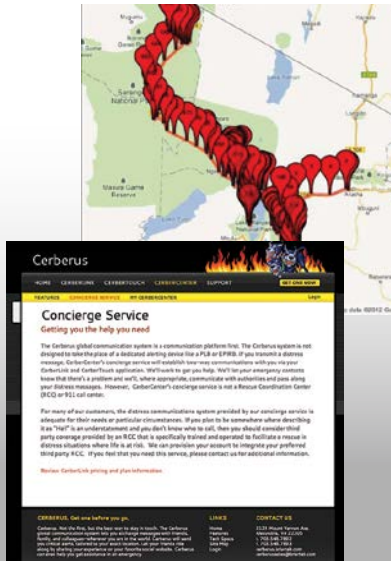

- Receive customized alerts based on location, severe weather, and geo-political events

#### Communications

- Receive and send messages
- Receive message sent confirmation
- Send messages by satellite

#### Distress/Safety

- Two-way communication with Cerberus concierge service
- Forward distress messages to third parties of your choice

## the server CerberCenter<sup>®</sup>

CerberCenter is the web server that routes all satellite and Internet messaging to your CerberLink or smartphone. This also includes an online account to review messaging, sync naps, and control your settings.

## FEATURES

### Tracking

- View breadcrumbs on personal Google Maps page
- Link personal Google Maps to social media

### Communications

- View message on Google Maps page
- Share breadcrumbs on social media
- Link to your social media feeds to share progress with friends and family

### Distress/Safety

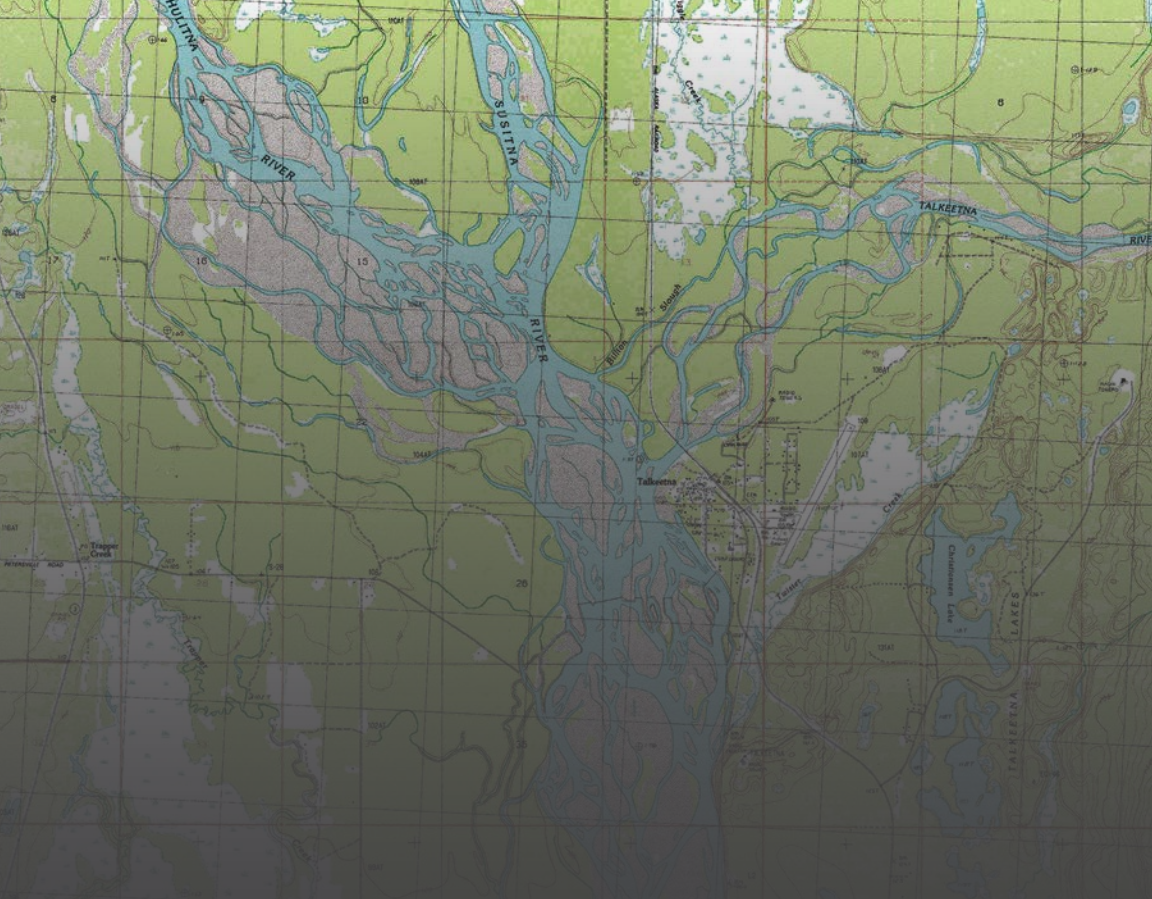

- Use Cerberus concierge service or have CerberCenter send all distress messages to a third party

### Alerts

- Set up customized alerts based on location, severe weather, and geo-political events
- Create your own alerts and rules
- Receive alerts by CerberLink, e-mail, or both

### Other

- Accounts can be integrated with the user's global rescue account
- Your account is always active and free to use
- If you don't use Cerberus Satellite hardware, you can still track, share files, and receive alerts over the internet or cellular data
